

Notification on Small Package Discontinuation

Dear Valued Customers,

We are writing to inform you of an upcoming change to the availability on smaller package sizes for our lyophilized BSA products. Effective in 3 months from this announcement, we will be discontinuing the commercially available smaller package sizes (10g, 25g, 50g, 100g, 250g, and 500g).

However, we want to assure you that the larger standard package sizes (10kg and 1kg) of lyophilized BSA are unaffected by this change and will continue to be available for purchase. Samples, including 100g samples, for customer evaluation prior to bulk purchase will continue to be available and are also unaffected by this change.

Smaller package sizes of lyophilized BSA produced by Proliant Health & Biologicals will be available through 3rd parties who repack Proliant Health & Biologicals' product into smaller containers with their own labeling, such as Lampire Biological Laboratories. (See table 1 for Product Code Correlation Mapping) Lampire Biological Laboratories' Customer Service Representative can be reached at Lampire@Lampire.com or +1 (215) 795 2838.

The Proliant team remains available to help you identify comparable products and help make this transition as smooth as possible. If you have any questions or concerns about this change, please do not hesitate to contact our sales or customer service team.

Thank you for your understanding and continued support of our products.

Description	Table 1.	Proliant Catalog #	Lampire Catalog #
Standard Grade BSA, pH 7.0		68100	7500802
Standard Grade BSA, pH 5.2		68500	7500803
