

Bovine Serum Albumin

Reagent Grade Fatty-Acid Free 22-28% Solution

SKU 68603

SCIENTIFIC ANALYSIS

ATTRIBUTE	SPECIFICATION	TYPICAL
Protein	22% to 28%	22% to 28%
pH	6.5 to 7.5	6.5 to 7.5
BIgG	None Detected	None Detected
Endotoxin	≤7.5 EU/mL	≤7.5 EU/mL

PRODUCT BENEFITS

- High Purity, Low Interference, Low Background
- No Detectable IgG or Endotoxin Activity
 - Ensures assay integrity, component stability, and cell culture suitability
- Superior Solubility/Filterability for Ease of Use

PROCESS BENEFITS

- Origin Traceability to Facilitate Regulatory Approval
- Closed-Loop Manufacturing*
 - Eliminates the possibility of contamination and maximizes reproducibility
- Product Development and Technical Services designed for maximum responsiveness and flexibility

QUALIFICATIONS

- Manufactured from USDA-inspected bovine plasma
- Validated for Prion (TSE) Clearance
- USDA/APHIS Registered for Shipment to the EU
- Manufactured according to FDA cGMPs
- TSE Certificate of Suitability

APPLICATIONS

- In-vitro diagnostics (IVD)
- Cell and microbial systems
- Protease-sensitive immunoassays such as:
 - RIA
 - EIA
 - Fluorescent
 - Chemiluminescent

DESCRIPTION

Proliant Bovine Serum Albumin (BSA) solutions are high purity, “Fraction V” solutions derived from the plasma of USDA inspected healthy animals from abattoirs located in the United States and New Zealand.

Fatty-Acid Free 22-28% Solution is a versatile fatty-acid free solution for a range of applications. Used in everything from standard diagnostics like ELISA and western blot to a stabilizer in biopharmaceuticals, its high monomer content is preferred as it can reduce the risk of interference in your application.

PHYSICAL CHARACTERISTICS

Proliant BSA solutions are a clear-to-slightly hazy and virtually particulate-free solution.

PACKAGING

Standard package sizes are 3L and 1L. Sample sizes of 100 mL are available for evaluation.

PACKAGE	SIZE
Standard	3L and 1L
Sample	100 mL

STORAGE RECOMMENDATIONS

Store frozen for up to 3 years from the date of manufacture.

ORDERING INFORMATION

Please order by referencing:

3L:	68603
1L:	68603-1L

*Proliant's unique **Closed-Loop** Manufacturing means that we collect only in exclusive abattoirs with our own USDA approved proprietary collection system. No other manufacturer can claim this important closed link, as they must buy their raw material from outside sources and the spot market. What's more, from the time our product enters our tankers to the moment it is loaded into the dryers, the product is not exposed to the external environment. Once the raw material reaches our cGMP plant, the material is loaded directly into our process and manufactured through a series of closed tanks, lines, filters and separation equipment. In our plant there are no exposed filter presses or open tanks, nor is any non-food grade or noxious solvent material introduced into the process. There is also no possibility of contamination with other animal-derived products or bovine tissues in our completely dedicated facility.
